New Business

***High Sierra RC Club's World Famous Roll-Out Party and
Chili Feed ***** May 14th, 2016 ********

You have been working all winter on repairs and new construction. Now, it's time to show off your pride and joy! Come on out, display and/or fly. Come on out and eat chili. Flying and Eating, what could be better? Back in 2011 our Party was featured in Model Airplane News. (see link below)

<http://www.modelairplanenews.com/blog/2011/05/09/roll-out-party/>

Doesn't that look good? Yummmmmm! I can't guarantee that the presentation will be that nice. You'll be lucky to get a paper cup. But I am sure it will taste as good as this picture looks. Bring your own heart burn meds!

A prize for "People's Choice" will be awarded!

ALWAYS PURSUEING MAINTENANCE.....from your Field Marshall

A couple of set-up tables "down" and several more to go.....Come out and inspect the new table tops and carpeting appearing along our row of set-up tables!

I think we had five tables with rotted fiberboard tops. And maybe 18 tables overall with deteriorated rug carpeting.

Dan Etcheto has taken the lead in repairing/replacing tabletops, and installing the new all-weather, sun resistant and quicker drying carpet surface. (I found out that "Velcro" sticks to it!)

If you wish to help out, contact Dan. Dan will be pleased to have your help.

Did your key to the Clubhouse not work well in recent months? Or not work at all? It will work now. We were able to have the insides of the troublesome lock reconditioned for a very nominal fee....

Currently, we do have key sets, and are considering ways to distribute keys to members who wish access to the Clubhouse (and toilet).

Driving is sometimes a problem for all of us, it seems. Sometime recently one of the poles in the parking lot pedestrian gate was hit and bent, tearing loose our overhead "HSRCC" sign. Richard Dugmore stepped up and said, "I would like a crack at fixing that!". And....he did. Richard was tidy up the work in the near future....

We have a “one-can” toilet, but who knew we had two-barrel storage? Recently, and after so many years no one can exactly remember the last time, the toilet waste tanks were pumped/emptied. This should do the trick for another half decade or so.

Where did the weeds go? Well, there is the weekly weed patrol by the Field Marshall. But also the City of Carson did a pre-emergent spray over our dirt areas. Very effective....
